

## **Kids question and answers-worksheets**

### **I wonder why the sun comes up...**

The sun gives us light. The sun gives us heat. The sun can dry our clothes. The sun helps the plants grow. The sun tells us its morning. The sun gives us pretty sunsets. Some people can tell time by looking at the sun. The sun ripens many fruits. The sun tans our skin. The sun recharges our brains.

### **I wonder we sneeze...**

A sneeze works like a vacuum cleaner, only the other way around. It gets rid of any specks of dirt by blasting them out of your nose. Anything like dirt or chemicals that get into your nose can turn on the sneeze reflex. When the reflex starts, your brain makes you take very deep breath. This happens during the “Ah-Ah-Ah” before the “Choo!” Air is quickly pushed up from the lungs and bursts out through your nose. The dirt gets carried out with the air.
