

## Kids question and answers-worksheets

### I wonder why ants lean their antennas with their front legs...

They clean their antennas because they can touch, smell and hear better with a lean antenna.

### I wonder why spider spin webs...

Spiders spin webs in the air to catch insects so they can eat them.

### I wonder why you never see baby butterflies...

You never see baby butterflies because butterflies hatch from their cocoons when they are full adults when butterflies are babies, they are caterpillars.
