

Kids question and answers- worksheets

I wonder why the ocean is salty...

Some of the salt in the ocean is from the land. When it rains, the following water picks up some salt and carries it to the rivers. Then the rivers carry the salt to the ocean. But we do not Know How salt first go in the ocean.

I wonder why snails are so slow...

It's because they have only one foot. The muscles in this foot tighten to make it move.

I wonder how starfish eat...

The starfish uses its feet to open a clams shell, then pushes its stomach onto the shell to absorb the clam.
